WEB DEVELOPMENT · WEEK 03

JavaScript Fundamentals

A beginner-friendly collection of JavaScript examples covering syntax, variables, operators, conditions, loops, and practice problems.

How to run

1. Open this folder in VS Code or another code editor.
2. Open `index.html` in your browser.
3. Open Developer Tools → Console (usually F12 or Ctrl+Shift+J) to view output.

01

JavaScript Basics

Syntax, statements, comments, and console output.

02

Variables & Data Types

`let` , `const` , primitive values, and `typeof` .

03

Operators

Arithmetic, assignment, comparison, logical, increment, and decrement.

04

Conditional Statements

Positive/negative, even/odd, eligibility, largest number, and grades.

05

Loops

06

Practice Programs

`for`, `while`, `do...while`, tables, and sums.

Five combined beginner practice problems.

Week 3 Assignment · HTML5 + CSS3 + JavaScript
